

CSCD 210

Lab 10

SPECIFICATION

Create a FileUtils.java set of methods that match the specification for CSCD210Lab10.java. This FileUtil will be used in future labs and homeworks. The specifications of the methods will be discussed in class.

TO TURN IN:

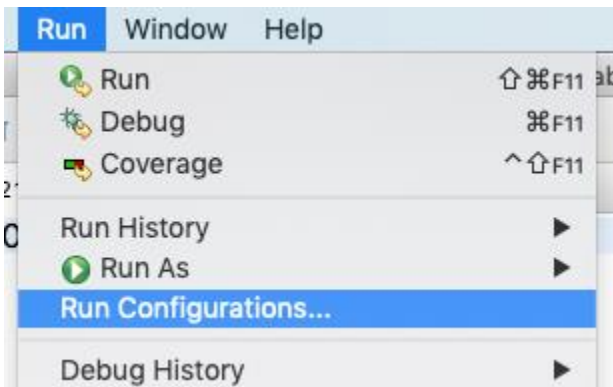

A zip file that contains Lab10 folder with:

- all packages and Java files
- cscd210lab10out.txt
- Your input files – you must create different input files and test your code
- Your output files

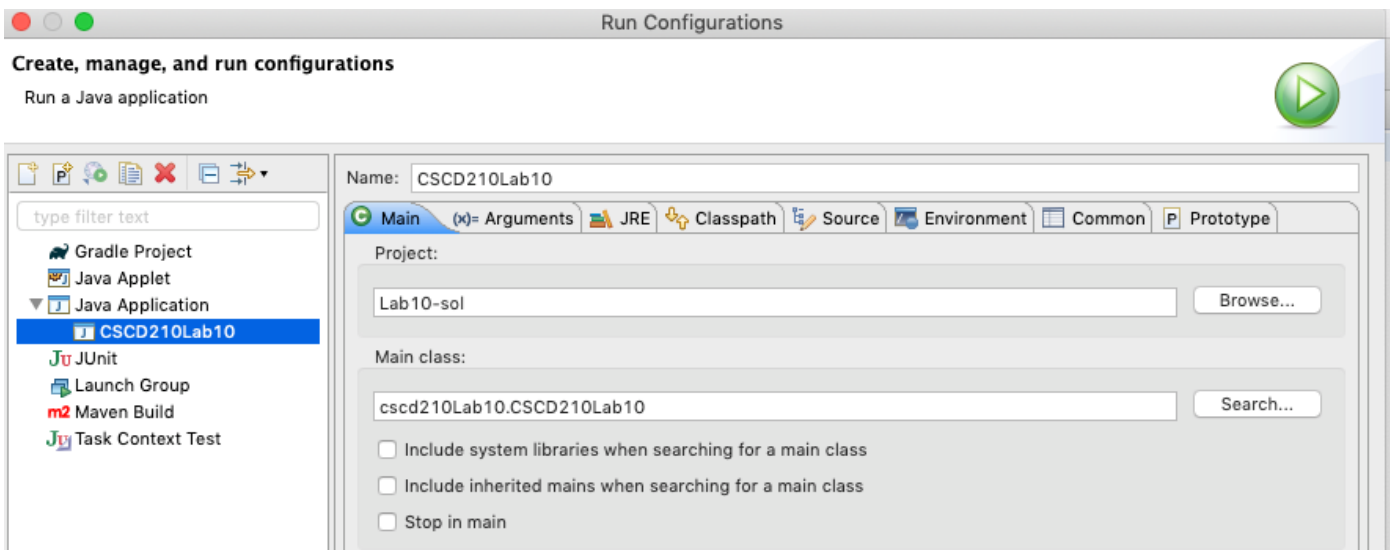

Name the zip file your last name first letter of your first name lab10.zip (Example: steinerslab10.zip)

This lab requires you to pass command line arguments to your program.

1. Chose Run -> Run Configurations

2. Chose Java Application -> The Java file that contains main

3. Under the Arguments tab insert the name of the file that would be passed on the command line
